Technical Projects

Weather App | Front End Developer | <https://priceless-leavitt-6b998e.netlify.app/>

Weather forecasting app displaying real time forecasts of inputted state.

Technologies used: HTML, CSS, Javascript

- Designed a weather forecast app using HTML and CSS creating a clean visual interface.
- Applied functionality using Javascript to update the shown information as the form is updated by the user.
- Integrated an API to retrieve the weather from a geological location found using a separate API for an accurate real time forecast.
- Deployed application through Netlify.

DnD Tracker | Full Stack Developer | <https://github.com/KeithLion/Solo-project>

Dungeons and Dragons campaign and user tracker

Technologies used: Python, MySQL, HTML, CSS

- Designed using CSS and Bootstrap to create a clean and readable interface.
- Built a campaign tracker using Python and MySQL allowing users to create a custom campaign or join a pre-existing campaign.
- Implemented full create, read, update, and delete features to allow users to create their character, update their stats as the campaign goes on, view their stats and open campaigns, and leave any campaign they may be in.

Professional Experience

Customer Service Specialist | Dicks Sporting Goods | Lafayette, LA | September 2021- Current

- Serving as a primary customer service provider at the front end standing as the primary communication between cashiers and management.
- Ensures customers receive excellent service by adhering to and enforcing customer service programs.
